SUMMARY

AI-focused Computer Science student with hands-on experience building LLM-powered applications using Python, LangChain, FastAPI, RAG, and NLP. Interested in Generative AI, Agentic AI, LLM applications, and intelligent systems, with practical experience integrating AI models, retrieval systems, and APIs.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL
Frameworks/Libraries: FastAPI, Pydantic, LangChain, LangGraph, NumPy, Pandas
Generative AI: LLMs, Prompt Engineering, RAG, Embeddings
Machine Learning: NLP, Machine Learning Basics, Transformers
Models & Platforms: Ollama, Hugging Face, Gemini, OpenAI
Databases: MySQL, ChromaDB, FAISS
Tools: Git, GitHub, Docker, Google Colab, Jupyter Notebook, n8n

PROJECTS

- IPL Copilot – AI-Powered Cricket Assistant** Aug 2026 – Present
Generative AI & Data Engineering Python, Pandas, LangChain, Ollama, ChromaDB, FastAPI
 - Implemented natural-language Q&A over 2008–2024 IPL data covering matches, players, teams, statistics, and ball-by-ball events.
 - Processed structured match data into metadata-rich documents for semantic retrieval and grounded LLM responses.
 - Integrated LangChain + Ollama with query caching and prompt engineering for efficient responses.
- AI Travel Planning Assistant** 2026
Generative AI & RAG Application Python, Pydantic, RAG, LangChain, LLMs, Frontend
 - Built an AI-powered travel planning application that generates personalized trip plans based on destination, duration, budget, and user preferences.
 - Used RAG to retrieve relevant travel information and provide more context-aware recommendations.
 - Used Pydantic for structured input and output validation and connected the AI backend with a simple user interface.

EXPERIENCE

- Agentic AI Intern** Feb 2025 – Jun 2026
Innomatics Research Labs Hyderabad, India
Designed an end-to-end LLM-powered AI application using Python, LangChain, NLP, and FastAPI.
Worked with LLM workflows, prompt engineering, and context handling to build AI-powered application features.
Integrated AI components with RESTful APIs using FastAPI to connect backend services with AI workflows.

EDUCATION

- Vignan Institute of Technology and Science** Telangana, India
B.Tech in Computer Science (Data Science) 2024 – Expected 2027
- Teegala Krishna Reddy Engineering College** Telangana, India
Diploma in Electronics & Communication Engineering 2021 – 2024
